

GUBI

Extended edition

ICONS, MEMORIES & STORIES

DESIGN BOOK

Many hours in life will be spent at home with objects and furniture collected alone or together with your family. This is the way most of us live, but only when we reach a particular level of memories and stories will it start to feel like a real home. What exactly defines this moment is hard to say. In my life, I've learned that this is very much up to the individual and what we surround ourselves with.

Today, the Gubi collection, has become unique and personal. To me it feels like home. It is a collection that embraces tales of distinct personalities and true visionaries of their time. Bringing all these designs together under "one roof" is our way of gathering memories, celebrating diversity and historical relevance. At the same time we believe it reflects the way you create a home.

It takes special effort and careful editing to build a collection of icons that span almost 100 years of design history - from the early days of Bauhaus and Bestlite, to Greta M. Grossman conquering a man's world with her feminine style and sense of detailing to the recently launched Beetle chair from GamFratesi, who represent a new interpretation of the meeting between Danish and international design traditions. All these stories are treasured and embedded in our collection of designer icons!

What's common for all our designs is that they share some characteristics and qualities. In their own way each and everyone has challenged the ordinary upon creation, others were innovative for their time. We think this gives a personal appeal while it enables them to pass through time as true design icons.

At Gubi we've been travelling for several years now, gathering treasures and icons of the future along the way - and it is with a special sense of accomplishment that I now state that we have reached our destination - we've come home and we want to embrace this feeling for a little while...

Welcome home in the Gubi design house!

JACOB GUBI
CHIEF CREATIVE OFFICER

SELECTED DESIGNER PORTRAITS

44 GRETA M. GROSSMAN [1906-1999]

At Gubi we have a love affair with Grossman and it is essential to us, that this unique Swedish female design icon, who took the US by storm in the 1940's and 50's stays honored and remembered for her contributions to the Californian Design movement.

114 GAMFRATESI [2006-]

GamFratesi & Gubi have embarked on a new journey... In 2013 two new design items, the Beetle Chair & the Paper Table, from young and progressive Danish-Italian design duo – Enrico Fratesi & Stine Gam - will see the light of day. We had a chat with the duo about the process of getting from a bug to a chair and how a messy stack of ruled paper can become the source of inspiration for a table.

130 JACQUES ADNET [1900-1984]

Architect and interior designer, Jacques Adnet, defined himself as "innovative and classic, the champion of a tradition looking into the future". This premonition appears surprisingly precise as his designs stand out as some of the most convincing examples of timeless design today – the perfect blend of traditional craftsmanship and modern foresight. Danish design house Gubi is proud to materialize Adnet's vision once again, with the re-launch of two of his beautiful mirrors: Adnet Rectangulaire and Circulaire.

TIMELINE

45 YEARS OF DESIGN HISTORY IN 10 MINUTES

- 1967 *Gubi founded by Gubi & Lisbeth.
Design of cake tins, hammock & furniture series in denim fabric combined with acrylic tables*
- 1975 *Horse blankets introduced as furnishing fabric*
- 1978 *Launch of Holmen Holmen cloth and blankets*
- 1982-1985 *Launch of the Furniture Series including Grand Piano, Diva Daybed and Louis Sofa, Lounge Chair and Table*
- 1988 *Gubi begins as a distributor of BestLite and several Spanish agencies*
- 1990-1992 *Opening of store in Godthåbsvej, Frederiksberg which is continuously extended*
- 1994 *The business in Grønnegade established*
- 1999-2001 *New concept with high-end furniture and design and fashionwear from Prada, Fendi and Louis Vuitton*
- 2001 *Jacob Gubi takes over the management of Gubi A/S and makes a radical change
by Paul Leroy*
- 2002 *Total furnishing of Nesa combined with the development of the Gubi Chair*
- 2003 *Beginning of the cooperation with Komplot Design with the Gubi Chair
Launch of GOS 2 and GOS 3 in collaboration with Andrius
Introduction soft coating as a new surface for furniture
Awards: The Innovation Award, Neocon Chicago*
- 2004 *Gubi receives the Danish Design Prize for the Gubi Chair
Gubi takes over all rights to the Bestlite
Awards: Red Dot Award and DDD*
- 2005 *The Gubi Chair becomes part of the Gubi collection
Gubi wins a design competition
Independent focus on Brand
Gubi moves to the Frederiksberg
Gubi delivers furniture
Gubi Chair 2*
- 2006 *Awards*
- 2007 *1*
- 2008 *2*

THE BESTLITE COLLECTION ● 🏠

Designed by Robert D. Best [1892-1984]

1930 Bestlite has been in continuous production since 1930. Robert Dudley Best (1892 – 1984) was fascinated by the Bauhaus movement's lean design and revolutionary demands for a new era free from superfluous decoration. It was in this spirit he designed the Bestlite lamps. Its unique aesthetic and functionality have made it a modern design icon.

THE GROSSMAN COLLECTION ● ○ 🏠

Designed by Greta M. Grossman [1906-1999]

1948 Greta M. Grossman (1906 – 1999) emigrated from Sweden to the US in the 1940's where she played a significant role in defining the aesthetic of midcentury Californian Modernism. Today her designs are highly collectible and are sold at auctions all around the world. In Grossman's products everything is unique in their lightness of form with elegant, asymmetric lines.

THE ADNET COLLECTION ● 🏠

Designed by Jacques Adnet [1901-1984]

1950 Jacques Adnet (1900 – 1984) was best known for his Art Deco Modernist designs, his partnership with Hermès and as an icon of French Modernism. He was one of the first to integrate leather, metal and glass in the structure and decoration of furniture. His style is the epitome of luxury and he created a legacy of fine design that feels modern even today.

THE PEDRERA COLLECTION ● ○ 🏠

Designed by Barba Corsini [1910-2001] & Joaquim R. Millet

1953 In 1953 Barba Corsini renovated the loft space within Antonio Gaudí's famous building "La Pedrera" in Barcelona, transforming it from a simple laundry room and storage area into 13 modern duplex apartments. To reinforce the modernist style of the rooms, Corsini decorated the apartments with furniture that he designed himself, including the Pedrera lamps and table for which he achieved great international recognition.

THE MATEGOT COLLECTION ● ○ 🏠

Designed by Mathieu Matégot [1910-2001]

1954 Mathieu Matégot's (1910 – 2001) organic forms and lightness of touch create a sense of joy and the ground breaking and innovative techniques that he employed result in aesthetic and, above all, contemporary designs. Matégot was the first person to combine metal tubing with perforated sheet metal; a pairing that characterizes his work.

THE TURBO COLLECTION ●

Designed by Louis Weisdorf

1965 Louis Weisdorf's Turbo Pendant was created in 1965, but was first put into production in 1967 and has achieved great success over the years. It illustrates design at its best: It is simple in form, yet complex in structure and combines a sense of airiness and strength in a beautiful sculptural whole. The inspiration for the lamp is the lightness of the Japanese paper lamp but in a more durable and robust version.

THE QUISTGAARD COLLECTION ●

Designed by Jens Quistgaard [1919-2008]

1966 Jens Quistgaard was an original thinker, an entrepreneur, an innovator and a prolific designer. Through his collaboration with Ted Nierenberg, Quistgaard designed more than 4,500 products before his death in 2008. One of his most successful furniture designs is the distinctive Quistgaard Safari Chair, designed in 1965. Quistgaard Safari Chair is one of a kind and today is considered an international design classic.

THE SEMI COLLECTION ● 🏠

Designed by Bonderup & Thorup

1968 The Semi was designed in 1968 as a product of the creative partnership between the two architects, Claus Bonderup & Torsten Thorup. Semi, with its distinctive arch-shaped, enameled metal shade, lightness of form and unique timeless design, is based on the shape of two quarter-circles put together back-to-back. It first achieved great success in the 1980's and became a Danish Design icon.

THE GUBI OLSEN COLLECTION ○

Designed by Gubi Olsen

1982 Always with a global outlook Gubi Olsen, founder of Gubi, has created his own unique post-modernistic expression. The inspiration comes from the rich Danish traditions of craft and furniture production, mixed with historical and visual references such as French cinema, Napoleon Bonaparte and a grand piano.

THE GUBI CHAIR COLLECTION ○ 🏠

Designed by Komplot Design

2003 The Gubi Chair, designed by Komplot Design, was the first furniture design to be based on the innovative technique of moulding three-dimensional veneer. The 3-D design gives the chair comfort and a sense of lightness - the thickness of the veneer is reduced to half of that normally used. The Gubi Chair is part of the Museum of Modern Art's permanent collection.

THE LEROY COLLECTION ○

Designed by Paul Leroy

2007 The Leroy Collection features two quasi-sculptural designs: the Aoyama Table and the A3 stool. Aoyama, a district in Tokyo famous for its fashion houses, restaurants and interesting shops is where Danish-French architect and designer, Paul Leroy found his inspiration for the Aoyama table

THE GAMFRATESI COLLECTION ○ 🏠

Designed by GamFratesi

2008 The design partnership, GamFratesi embodies the meeting between Italian and Danish design. The contrasts are often the key to their inspiration. They work strictly within the Scandinavian approach to craft simplicity and functionalism but there is always a strong emotional pull towards the concept, and the story behind each piece.

Y! TABLE COLLECTION ○

Designed by Henning Larsen Architects

2009 With simple, classic lines and beautiful wooden tabletops, the versatile Y! table enhances any room. Y! Table was designed by Henning Larsen for Gubi in 2008 and with its many combinations is suited to all types of homes.

THE RONDE COLLECTION ●

*Designed by Oliver Schick**

2013 The Ronde Pendant is Oliver Schick's first product for Gubi. The bell-shaped spun aluminium shade has references to the traditional archetype of a pendant lamp. A unique detail is the opening on the top with an overhanging collar that reminds of a jar such as a vase or an amphora. Ronde is also in several languages the word for round, circular or rotating.

OVERVIEW THE GUBI DESIGN COLLECTION

LIGHTING

True design icons can enter into any space and create a statement – much like art, lighting a space is often an aesthetic and artistic part of the interior. It usually also calls for a moment of reflection, and like the natural light often catches our eye, we aim to gather designs that encapsulate this along with our design values into a unique and iconic expression. We believe that lights are really what completes a home.

Some of the latest designs in our lights collection is the Turbo pendant, a glowing architectonic gem, created in 1965 by the Danish architect, Louis Weisdorf and the minimalistic, amphora-inspired Ronde designed by the young German designer, Oliver Schick.

PORTRAIT GRETA M. GROSSMAN

GROSSMAN INTERIOR

GROSSMAN'S LIGHT AND SENSIBILITY

Designer portrait about Greta M. Grossman

At Gubi we have a love affair with Grossman and it is essential to us, that this unique Swedish female design icon, who took the US by storm in the 1940's and 50's stays honored and remembered for her contributions to the Californian Design movement.

Few have accomplished what Greta M. Grossman did in her time, much less women – only to then disappear from the scene and become almost completely forgotten.

Grossman was one of the first women to graduate from the Stockholm School of Industrial Design in the early 1930's, today known as Konstfack. Like so many of her peers, she was influenced by European Modernism and great architects such as Walter Gropius and Mies van der Rohe. But, at the same time her designs still remained unique and surprisingly functional, while simultaneously delicate and powerful. She had her own vision!

"The only advantage a man has in furniture is his greater physical strength."

The lack of recognition for female talents kept her on her toes – It definitely sparked a strong will and determination to prove her capacity to the world, but it had already started when she joined a local furniture factory and carpentry. Working solely among men, she quickly proved herself and got a sense of the craftsmanship and materials – she got a feel of the furniture industry from the ground up – something that without a doubt made her able to keep her designs equally aesthetic and useful later in life.

She was a woman of many talents – working with everything from sculpting, drawing and writing to architecture. However, it was really in some of her less known furniture and perhaps even more in her lamps designs that her unique sense of form and delicate design language really came to life. Grossman's lights were always distinguished by the use of simple, soft-edged forms and the use of fashionable but contemporary colors. To Grossman modern design was;

"not a super imposed style, but an answer to present conditions... developed out of our preferences for living in a modern way."

In the late 1940's and 50's Grossman conceived a variety of designs for the lighting manufacturer Ralph O. Smith and the furniture manufacturer Glenn of California. She was acutely aware of the American design aesthetic that was becoming popular, and she blended it with the understated language of Scandinavian design to create her own distinctly California-style furniture.

ARTICLE FROM WHEN GROSSMAN ARRIVED TO THE US // INTERIOR GROSSMAN

She used new materials, introduced a playful nature to her pieces, and responded to the changing lifestyle of the modern California household. The most famous of these lights is the Gräshoppa floor lamp from 1948 and the Cobra table lamp from 1950, that also won the Good Design Award and was subsequently exhibited at the Good Design Show at the Museum of Modern Art.

In 2013 and from exactly these two iconic designs Gubi will extend the Grossman Collection with a series of re-editions – The Gräshoppa Task Lamp, The Gräshoppa Pendant and The Cobra Wall Lamp. All designs are original and will be available in a series of finishes and colors that stay true to Grossman’s designs and vision.

The Gräshoppa Task Lamp and The Cobra Wall Lamp were first seen as part of her installations in the late 40’s and early 50’s and were part of the extensive collection of lights that was originally designed for the

Barker Brothers together with Ralph O. Smith, a manufacturer in Burbank, California who put most of Grossman’s lighting design into production. However, as many other of her designs, they were only produced in very limited numbers which make the original models extremely rare and very much a collector’s item. The Gräshoppa Pendant is a re-styling by Gubi using the original screen as a pendant.

The Grossman Collection now consists of nine iconic designs; The Gräshoppa floor lamp, the new task light and pendant, The Cobra table lamp, floor lamp and now also wall light. Notable is also the entire 62-series consisting of a desk and three different dressers with three, four and six drawers. Each and every Grossman design is unique, light and iconic in expression – equally relevant today as when first introduced.

FURNITURE

Furniture is the building blocks with in which we create a home. There are many aspects to consider, and the choice of your future dining chair, writing desk or your sofa is not to be taken lightly. There's a demand for functionality, for comfort and also integrating your pieces with the architecture and layout of the space itself.

We encourage that you take your time and carefully select the memories and stories you should surround yourself with for many years to come.

In the furniture collection the Gubi chair family, designed by Komplot design in 2003, has been extended with a slender and light metallic center base. To compliment this series, we have designed a whole new range of wooden Gubi dining tables. These extensions bring forward fresh and different opportunities for it's use and styling. Also, the iconic Beetle chair and Paper tables from GamFratesi, recently awarded the EDIDA Young Designer Talent Award, are future classics that we are happy to welcome into with the family!

PORTRAIT GAMFRATESI

DESIGN PROCESS BEETLE

FROM A BEETLE TO A CHAIR

Q&A with GamFratesi

GamFratesi & Gubi have embarked on a new journey... In 2013 two new design items, the Beetle Chair & the Paper Table, from young and progressive Danish-Italian design duo – Enrico Fratesi & Stine Gam – will see the light of day.

Together with the Masculo Chair from 2008 these will now constitute the GamFratesi Collection, an eclectic repertoire of design experimentation defined by the dynamic meeting between classic Danish and Italian design traditions combined with the couples characteristic use of playful and surprising elements – Oh yeah, and beetles, of course. We had a chat with the duo about the process of getting from a bug to a chair and how a messy stack of ruled paper can become the source of inspiration for a table.

Q: How do you get from the first idea to a final model?

A idea can come from a deep reflection or from a spontaneous vision. Often even in the most unexpected moments. Research and working in the workshop are very important to us and it is never just a drawing. We work strictly with the Scandinavian approach. In all the projects we are used to having our hands on the materials, working directly on the physical prototype.

Q: What is your fascination with insects? Why Beetle...

We first designed the Beetle chair prototype for the annual exhibition

Mindcraft 12 in Milan curated by Danish Crafts. We found the general anatomy of the insects very interesting. The structure is made of different plates separated by thin sutures and this external shell supports and protects the animal's body. All these elements are perfectly linked and work in a fascinating way. Among the different insects the classic beetle looks gentle and charming so we ended up looking closely at beetles...

Q: How do you get from the insect world to furniture?

The design of the chair reinterprets the characteristic elements of the beetles' sections: shape, shells, sutures, rigid outside and soft inside, while maintaining comfort and functionality.

Q: A stacking chair with castors... that's very unusual. Why did you make it like this?

We started of by looking at the dynamic ability of the insect in space and reinterpreted that to a four-legged chair on castors. We then proceeded with the idea of adding more value to the design, by creating a structure that allows the chair to be stacked.

FROM A BEETLE TO A CHAIR

PROTOTYPE MASCULO LOUNGE

Q: How do you maintain the balance between traditional & surprising?

Often, a small detail is all it takes to achieve or ruin an expression, and we are very curious about that. We work intensely with the balance between harmony and disharmony, believing that somewhere in between you obtain reflection. This for instance, can be seen in the use of piping on the Beetle chair which also defines the shape. It is particularly clear on the back where the two shells meet.

Q: What are your individual roles and how do you compliment each other in your work?

We do work very closely through all the different stages of the creative and developing process. We share many of the same competences and interests, and appreciate being able to work in such a tight collaboration. It is a rather symbiotic process, where we are both so much into it, that it often is impossible to distinguish who started and finished what. Enrico is very methodic and structured, while Stine is more loose and messy. But in many aspects we are very similar, for instance, when it comes to convictions, joy, anger or frustrations. Our range is quite parallel.

Q: You continually travel and work in two places... What do you get from this?

Studying, researching and moving constantly between our two countries have become such a natural part of us that it will most likely show in our work. Copenhagen is a unique place, a real sustainable city with a functional infrastructure and many cultural activities. Italy has a unique tradition and history. Also, we know some amazing craftsmen in Italy that work with us on the prototyping stage.

Q: Paper Tables... There's almost a contradiction in the name itself. How did this come about?

It was not a project that was defined in advance. One day the placing of two sheets of paper suddenly created a focus in the chaos on the desk. By catching and enclosing in the confusion of lines in circles, they started to appear with a certain geometrical beauty and logic. The result is simply reinterpreted in the tables by the use of veneer.

Q: What has been the main challenge in the design process?

For the Beetle it was the issue of merging the two shells, avoiding any visible connection, and resolving the upholstery with a precise solution. In terms of the Paper table, it was the challenge of defining the veneer typology and colours that expressed the idea behind the project most suitably. The simple play of veneers, become as a silent and delicate graphic in the space.

Q: How do you see the two new designs in connection with the rest of the Gubi Collection?

The chair is a friendly combination of classic and contemporary lines in unification with great quality and craftsmanship - the fundamental characteristics of the Gubi collection. The chair is suited for informal meetings, allowing mobility around the table creating a flexible and spontaneous workspace. The tables work as a functional and playful product in the collection as they can create different expressions and functions, depending on the size and number of tables combined.

ACCESSORIES

Accessories are objects that reflect our taste and create a personal atmosphere – it enhances that space that it is put into and makes a statement. These items can break the boundaries of a traditional decor and may be used to form a new direction - they are also often the subject of conversation. They can be equally sculptural as functional. We hand-picked these objects for you to show off our individual style and personality.

The latest collectibles are new rectangular versions of the exclusive and handcrafted Adnet mirror. Designed by Jacques Adnet in 1946, it is the perfect example of French Modernism. Also the delicate, almost playful Mategot series, created by Mathieu Mategot in the 1950's, has been extended with a re-issue of the iconic coatrack in brass and all black.

PORTRAIT JACQUES ADNET // THE ÉCOLE DES BEAUX-ARTS

SIDE TABLE IN LEATHER AND GLASS // ADNET TOOK PART IN THE ANNUAL ART EXHIBITION SALON D'AUTOMNE

FRENCH MASTER OF THE DECORATIVE ARTS

Designer portrait about Jacques Adnet By Cedric Morriset

Architect and interior designer, Jacques Adnet, defined himself as “innovative and classic, the champion of a tradition looking to the future”. This premonition appears surprisingly precise as his designs stand out as some of the most convincing examples of timeless design today – the perfect blend of traditional craftsmanship and modern foresight.

Danish design house Gubi is proud to materialize Adnet's vision once again, with the re-launch of two of his beautiful mirrors: Adnet Rectangulaire and Circulaire.

“He was ahead of contemporary trends”, said Alain-René Hardy of Adnet in the definitive monograph on the artist which he co-authored with Gaëlle Millet (published by Editions de l'Amateur). For this expert on the decorative arts of the 20th century, Adnet was also always among the first artists to express new trends, proof of which can be seen in the various stages of his career.

In the 1920s, each great Parisian store had its own design studio with its own name: the design studio belonging to Printemps was called “Primavera”; the studio of Bon Marché, “Pomone”. At the Galeries Lafayette, Maurice Dufrene was the artistic director of “La Maîtrise”. Adnet graduated from the École des Beaux-Arts in Paris in the early 1920s, and came by chance into contact with this well-known decorative artist, who gave him an opportunity in the design studio. Scarcely had Adnet arrived there

before he made a name for himself by rejecting the established style, a move that propelled him in 1927 to the directorship of the Compagnie des Arts Français, which had been purchased by a shareholder of Galeries Lafayette.

As the successor of Süe and Mare, Jaques Adnet not only developed creations in a new “bourgeois modernist” style, but also audaciously invited collaborations from a number of major creators of the period, including Charlotte Perriand, Jean Puiforcat and numerous wallpaper artists.

Adnet was an innovative thinker, but was also original in his choice of form and materials, including metal and glass. It was therefore natural that the glass manufacturer and research company Saint Gobain should commission him to design a pavilion dedicated to the material for the 1937 Exposition Internationale des Arts et Techniques in Paris. The pavilion was as spectacular in its construction as in its taste, and earned Jaques Adnet not only the Grand Prix d'Architecture et d'Ensemble Mobilier, but also the first choice of new glass technologies.

L'ART DÉCORATIF

LAMPS PUT INTO PRODUCTION AT THE COMPAGNIE DES ARTS FRANÇAIS IN 1928-30 // HERMÈS IN PARIS

SKETCH OF THE PAVILLION - A COLLABORATION WITH ARCHITECT RENÉ COULON // INTERIOR SKETCH FROM SALON AVEC BIBLIOTHEQUE 1948

“Jacques Adnet put these to good use”, recalled Alain-René Hardy. He was one of the first artists to employ coloured mirrors and the new architectural glass, with which he created chairs and tubular bedside tables. He also produced the mirrors and small items of furniture entirely constructed of silvered glass screwed to a frame which were to make his name.

In the aftermath of a period of creation inspired, under the influence of the Regionalist movement, by ancient furniture – which can also be seen in the work of Charlotte Perriand (particularly in her tripod stools and straw-bottomed chairs) – in the post-war period, Adnet began to cover his furniture with leather. Although a true member of the avant-garde in his time, the decorative artist was not alone in employing this technique. While Jaques Quinet and Paul Dupré-Lafon produced furniture covered in metal, throughout the 1950s and 1960s, Jaques Adnet employed wood, bamboo or a wide choice of coloured leather.

The quintessence of the “Adnet spirit”, the Adnet Rectangulaire and Adnet Circulaire mirrors embody both the creator’s passion for glass and the integration of leather that made his reputation. These timeless mirrors, one

circular with a leather strap and the other rectangular and studded with the buckets are characteristic for his work, revive the talent of one of the most revered French designers, whose perennial and innovative work is still highly sought after.

“This leather furniture has always been popular”, explained Alain-René Hardy, “because it represents good taste and good style. The legend that tells that Jaques Adnet had his furniture covered by Hermès also undoubtedly contributed somewhat to his success.”

With these designs being part of the Gubi collection, Adnet’s visionary work has now found its place among the best-known signatures of modern design. The continuing story of a never-ending success.

Cédric Morisset, an Independent Journalist and Curator and Design Consultant has been working in the field of interior and product design as a design consultant for major companies in the world of luxury products, retail design and media. In addition to his consulting business, Cédric Morisset also work as a journalist for Le Figaro, AD France and L'Express.
